

Bottle labeling machine and label printer

Typical applications:

Farm shop, weekly markets, fairs, organic food stores, organic restaurants, "oil bars", etc.

Labeling System – Applicator AP360e

Labeling System Applicator AP360e by Primera Fast and accurate application of self-adhesive labels. The semi-automatic label applicator series can attach up to 1200 labels per hour on your cans, bottles, jars and other containers. Application without waves, bubbles or wrinkles for a high-quality and professionally looking packaging for your finished products. In combination with the Primera LX and CX color printers, the applicator series closes the gap in the production of professional labels. Moreover, the devices of the Applicator series are also capable of applying roll labels from almost all flexo, offset and digital printers. They are available in two different model variations. For applying single labels, the base model AP360e is the right solution. The built-in LED display indicates the number of the already labeled products and the integrated memory for up to nine different label settings for the front and back label supports the processing of recurring production orders. The AP-series label applicators are ideal accessories for the LX400, LX810 and CX1200 label printers from Primera.
